

Dynamic Team Page Plan

Checklist

- ☒ ~~Research Team Webpages & get inspiration~~
- ☒ ~~Finish Wireframe~~
- ☒ ~~Finish CSS + HTML~~
- ☒ ~~Finish Javascript~~

Goal

Create a dynamic team page with at least two team members information. Each individual must have information appear one at a time dynamically. We need two images, two headings & 2 paragraphs to go into one div - displaying information separately upon clicking a button.

We can do this by appending an img, p & h2 tag to the div using the dataset information in Javascript. The p tag can be "Bio", h2 will be "Name", and img will be "Image"

p = "Bio"

h2 = "Name"

img = "Image"

From there, we can use CSS to style each element via "#info-div h2", etc.
